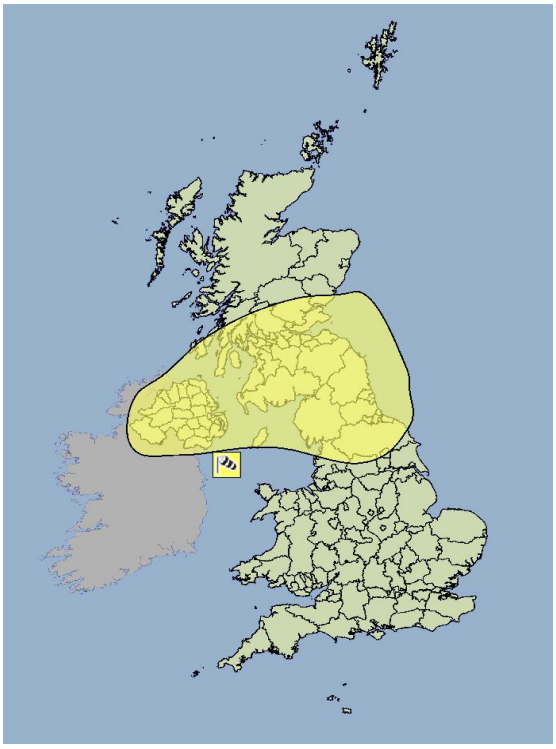
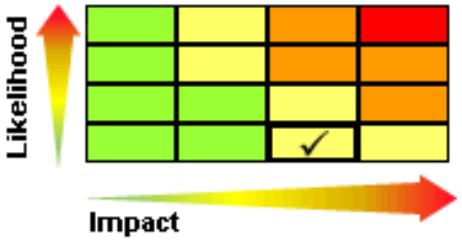
National Severe Weather Warning Service





Chief Forecasters Assessment
Very strong winds are forecast to continue to affect some parts of the UK during Tuesday. Southwesterly winds are most likely to gust between 50 and 60 mph across much of the warning area with the potential for gusts of 70 mph across the Central Belt of Scotland and parts of Northeast England. Although the strongest winds are likely overnight they may last into the morning's busy travel period across the Central Belt of Scotland and more especially Northeast England.

The worst of the winds should ease from Northern Ireland in the early hours of Tuesday and from eastern areas of Scotland and northern England by early afternoon.

Heavy rain is also possible in association with this system with western Scotland most prone at this stage.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **00:05 on Tue, 17th Oct 2017** until **15:00 on Tue, 17th Oct 2017**

A spell of very windy weather is likely on Tuesday in association with ex-Ophelia.

Road, rail, air and ferry services might be affected, with a slight chance of longer journeys times and some roads and bridges could close. There is a slight chance that power cuts may occur, with the potential to affect other services, such as mobile phone coverage.

This warning has been updated to bring forward the end time slightly. The northward extent of the warning area across Scotland has been reduced but it has been extended slightly further south across Yorkshire.
